committee to examine securities was deferred until the 27th inst., when the board of directors will again meet at County Agriculturist Glaisyer's office, and when it is expected that many more names will be added to the list of members.

The fact that already the membership in this new organization extends from Pine Grove to Keno and intervening points, speaks itself for the spirit of co-operation developing among the farmers of Klamath county.

Any farmer desiring to join before papers are forwarded to federal authorities should get in touch with any members of the board of directors or notify County Agriculturist Glaisyer or the secretary treasurer.

## Latest Photo of Czarevitch and Pets

This photograph of the czarevitch heir to the throne of all the Russias, the latest picture taken, shows him to have grown considerably in height since the last authentic photo at the

beginning of the war. This is the boy who has some mysterious disease or impediment about which the royal family has been very reticent. It is known that his health is delicate.

## Girl Slayer Confesses

W. W. WELLS

Weldon W. Wells, former clerk to a broker in Kansas City, confessed to County Prosecutor Duncan at Columbus, Ohio, he killed Mona Simon in a hotel there Friday night. She belonged in West Virginia. He had induced her to go to his room, he said, where they quarreled. She attacked him with a razor, he declared, and then he shot her in self defense. Wells was caught at Huntington, Ind.

past four years—on the car just mentioned, and one sent out in 1915.

The car rate from San Francisco to Klamath Falls, and then to Chilquin is \$117.50; from Chilquin to San Francisco, \$117.50; from Chilquin to Portland, \$117.50; from Portland to Klamath Falls, \$111.50; from Portland to Chilquin, \$119.50.

These figures speak for themselves. I am charged \$28 for a car from Klamath Falls to Chilquin, or \$32 more to ship from Portland to Chilquin, or \$32 more to ship from Chilquin to Portland. If I had shipped from Chilquin to San Francisco, the rate would be the same both ways.

Surely, surely a competing line will remedy such cases, besides, this particular line will certainly give us a much better rate to and from Portland, our logical point for all stock shipments.

I have no doubt that you expect to see your country cousins to help in

this matter, and if I can be of any service to you I will act willingly. If this letter or these figures will be of any benefit in any way to you, you are at liberty to use them as you deem best.

Wishing you success in your very worthy endeavor, I am, sincerely yours,  
JAMES PELTON.

## Senate Passes Bill to Abolish Office

Continued from Page 1

expressing our personal views, and we also recommend that every honorable method be employed to defeat any effort to discontinue that office. The office, in our opinion, has been ably filled and economically handled, and we are of the opinion that no saving could possibly be effected by its discontinuance, while we feel certain that the efficiency of the circuit court would be impaired by the change and the public discommoded. This is entirely outside of the fact that the practitioners and their clients would be inconvenienced and be caused loss of time, even more by reason of the mingling of the records of the circuit court with the records of the county court and recorder's office, which, in itself, would be a serious matter, to say nothing of the necessity in Klamath county of providing further vault room for the county clerk, while recently the clerk of the circuit court has been provided with adequate vault room for his office, and for the efficiency of the circuit court and of the bar of this county, and for the benefit of the general public at large, we desire to reiterate against the passage of any act by the state legislature abolishing the office of clerk of the circuit court for Klamath county, Oregon, which would lower the standard of efficiency in the court and at the bar without any possible saving to taxpayers of Klamath county.

Be it therefore resolved, That the members of the legislature in this legislative district, and all of the members of the legislature are hereby requested to use all honorable ways and means to defeat the passage of said bill, and the Bar Association of Klamath county would highly appreciate any action which the Honorable George T. Baldwin might see fit to take along the lines of considering the advisability of withdrawing the bill. Such action upon his part would be greatly appreciated by his friends in the Klamath County Bar Association.

three, little man, barefoot boy with cheeks of tan." is not appreciated until we suffer with corns, bunions, growing toenails, flat foot, backache, and other troubles due to ill-fitting shoes, and then the blessings of our barefoot days are pleasant recollections.

Shoes should be made to fit the feet, instead of feet being made to fit the shoes. Chinese women suffer untold misery by wearing small wooden shoes just to have club feet, which appear so beautiful to the Chinaman's aesthetic taste. American women suffer with corns and displacements of the pelvic viscera, just to have distorted feet—things of beauty, as measured by the Orient's standard. American people should not be slaves to shoe manufacturers.

The foot of man is a wonderful mechanism! It consists of twenty-six bones solidly constructed to form a firm basis of support for the body, and yet the two arches found in the foot give it remarkable elasticity which sustains the body and protects it from violent concussions which might be received in jumping and similar actions. The architecture of the foot is found in two arches: one longitudinal about ten inches in length, and one transverse at the front of the foot. These give strength and provide a hollow in which the muscles, nerves and vessels of the sole may lie protected from pressure. The wearing of steel arches in the shoe is contrary to the anatomy and functions of the foot. The arches of the foot are maintained because the tendons of the large calf muscles are inserted in a fan-like manner, tying the bones strongly together, so we virtually stand on our muscles. Ligaments would soon stretch, producing flat foot, but muscles do not.

The line of the foot from the heel to the toe is directed a little outward. The inner border of the foot is a little convex, and the outer a little concave. Wear the shoe that most nearly conforms to the shape of your foot. Walk by rising from the ball of the foot. With the exception of the bear, man is the only flat footed animal. The most active animals walk on their toes.

A bunion is a growth of bone and cartilage due to bending the big toe away from the median line. Corns are caused by pressure forcing the blood away and then by relaxation and engorgement of blood. The market is flooded with cures, but take this tip—an ounce of prevention is worth a pound of cure.

DR. A. A. SOULE, County Coroner.
